Republic of Cyprus

CovScan Cyprus application

Immediately after that the application will ask for your consent to activate and use the camera of your device. Click “OK” and select when you wish the camera of your device to be activated:

- **“While using the app”**
- **“Only this time”**
- **“Deny”**

If you select “Deny” you will not be able to use the application.

If you select “Only this time”, every time you activate the application you will be asked to give your consent to the app to use the camera of your device.

If you select “While using the app” you will be able to use the CovScan Cyprus application without activating the camera again.

Therefore, it is recommended to select the “While using the app” option.

CovScan Cyprus application

STEP 1: UPDATE OF THE CONTROL INFORMATION

Before scanning the certificates, select the icon on the top right part of your screen (icon “?”) with the settings of the application. Click the “Reload” icon under "Trusted Public keys" to retrieve the latest list of public keys used by the application. This will take a few seconds. Now that the application is up to date, you can start the certificates' verification.

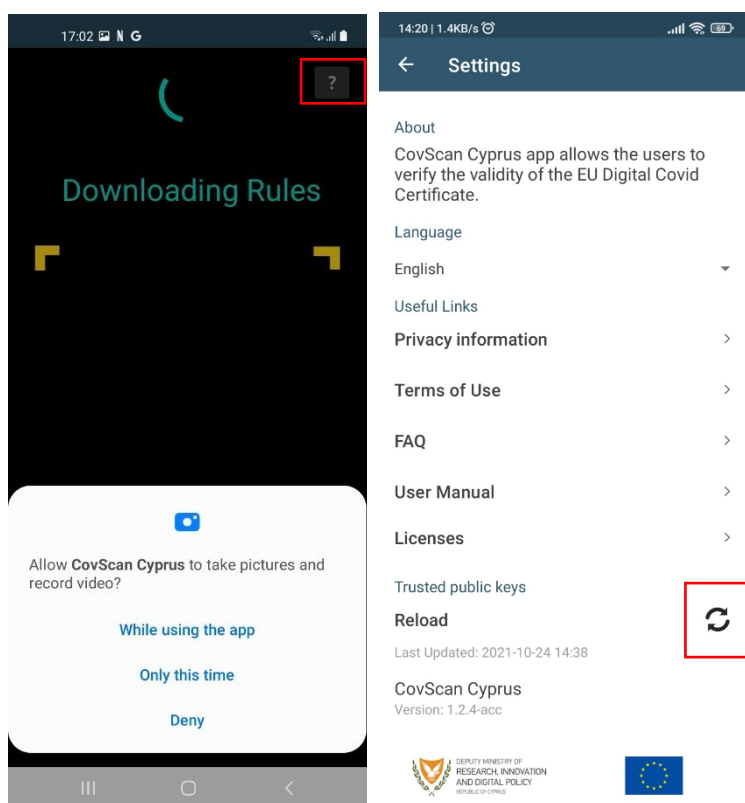

Figure 3: The page for the update of control information. By clicking the icon with the question mark on the top right part of the screen you open the settings of the application. Select “Reload” to update the information of the application. You may update the application once a day.

CovScan Cyprus application

STEP 2: SCANNING THE QR CODE

To scan the QR code move the camera of your device so that the yellow borderlines cover the QR code.

Figure 4: Scanning the QR code

CovScan Cyprus application

STEP 3: SCANNING RESULTS

After scanning the QR code the application will recognize if the certificate is valid or invalid. If the result is **Green** or **Yellow/Orange** or **Blue** the certificate is valid and if the result is **Red** the certificate is invalid.

The EU Digital COVID Certificate scanned will be valid if the following conditions are met:

- The person has been vaccinated with both doses against COVID-19. The period of validity is one year as of the date of the first dose;
- The person has recovered from COVID-19 in the past 6 months. The period of validity starts on the date of the first positive result;
- The person has received a negative COVID-19 molecular test (RT-PCR) or a negative COVID-19 antigen rapid test. The period of validity is 72 hours as of the sampling time.

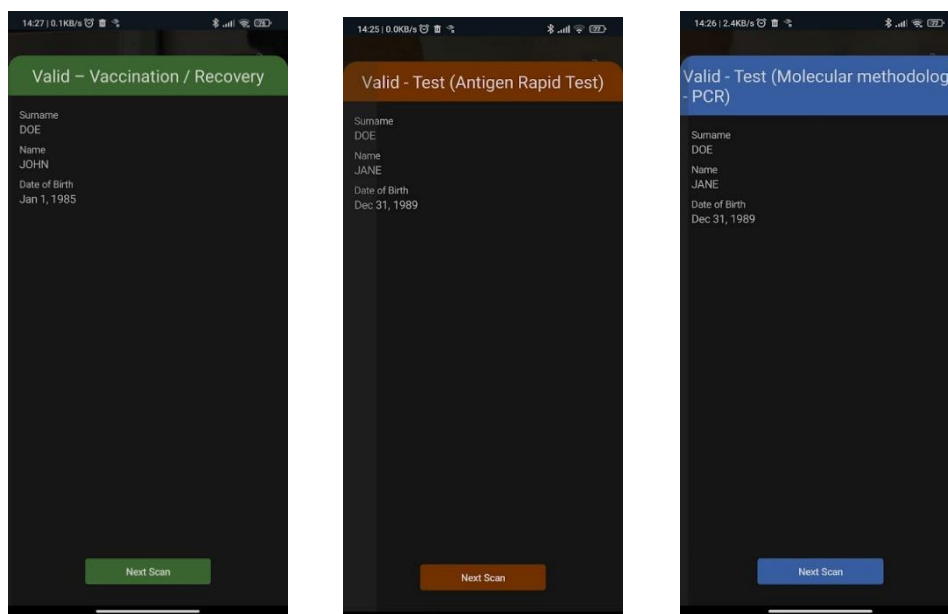

Figure 5: Scanning results. Green = Valid, Yellow = Valid and Blue = Valid

After 15 seconds the app will activate the camera again for the next check. You can immediately activate the camera by clicking “Next Scan”.

CovScan Cyprus application

If the certificate does not meet the above conditions, it will be recognized as Invalid. If for any reason the application gives a false result, you should reissue the certificate through <https://www.eudcc.gov.cy/>, and make sure that your details are correct.
